Subject: Tribes' Comments on the Remedial Design Data Gaps Work Plan

Kelly,

We have still not received the Tribes' comment on the Data Gaps Work Plan which was sent out for review in mid July along with several other design deliverables. The Tribes requested a 45 day review and additional extensions since the document was sent out. EPA considers getting input from the Tribes to be extremely important on this project. However, not being able to move forward on work plan implementation has serious repercussions on the schedule for this project.

EPA has already provided our comments and IDEQ's comments to FMC and has received FMC's response to our comments. If EPA does not receive comments from the Tribes by the end of the day on Monday, September 30, we will move forward with our response to FMC's comments and approve the Work Plan with minor required changes.

If you have any questions on this, please call Beth Sheldrake at 206 553-0220.

Sincerely,

Kevin Rochlin
